

TO WHOM IT MAY CONCERN

This is the issues to let you know that HBL Power Systems Ltd, installed the Rentar Fuel Catalyst on the company's furnaces (Six numbers) in 2010.

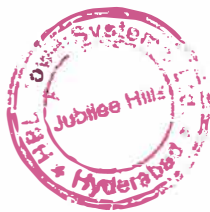

The catalyst has run consistently without any problems and HBL is experiencing an average fuel savings of 15.5 %.

Since then we have had more than 1000 units installed on different company's applications who are continuing to enjoy the savings.

Please let me know if anything else is needed.

Sincerely

A handwritten signature in black ink, appearing to read 'Venkat Kumar Tangirala'.
